Preface v

1 Introduction 1

2 Binoculars: What is it all about? 3
- 2.1 The prism binocular: History and evolution . . . 3
- 2.2 Porro- and roof prism binoculars . . . 4
- 2.3 Magnification . . . 5
- 2.4 Objective lens diameter and exit pupil . . . 7
- 2.5 Angle of view and field of view . . . 9
- 2.6 How to use binoculars . . . 10
- 2.7 Every optical instrument is a compromise . . . 12

I Fundamentals of binocular technology 15

3 Optical Imaging 17
- 3.1 Light in vacuum . . . 17
- 3.2 Snell's law . . . 18
- 3.3 Refractive index and dispersion . . . 20
- 3.4 Optical glasses . . . 21
- 3.5 Raytracing of a lens . . . 24
- 3.6 Imaging equations . . . 26
- 3.7 Optical aberrations . . . 29
  - 3.7.1 Longitudinal chromatic aberration . . . 29
  - 3.7.2 Spherical aberration . . . 30
  - 3.7.3 Field curvature . . . 31
  - 3.7.4 Astigmatism . . . 33
  - 3.7.5 Coma . . . 33
  - 3.7.6 Lateral chromatic aberration . . . 34
- 3.8 Optical design . . . 35

4 The Telescope 37
- 4.1 Keplerian scope . . . 37
  - 4.1.1 Fundamentals . . . 37
  - 4.1.2 Focal ratio . . . 38
