

4.1.3	Magnification and distortion	39
4.1.4	Angle of view	40
4.2	Galilean scope	41
4.3	Virtual image and depth of field	43
4.4	Physical optics	45
4.4.1	Huygens' prinziple	45
4.4.2	Diffraction limited resolution	46
4.4.3	Anti-reflective coatings	47
5	Image erecting prisms	51
5.1	Porro-type systems	51
5.1.1	Total internal reflection	51
5.1.2	Porro I	53
5.1.3	Porro II	55
5.1.4	Perger-system (A contribution from Dr. Andreas Perger)	56
5.2	Roof-type systems	58
5.2.1	Schmidt-Pechan-system	58
5.2.2	Abbe-König-system	61
5.2.3	Uppendahl-system	62
5.2.4	Hybrid mirror-prism systems	63
5.2.5	Reflective coatings	65
5.2.6	Phase shift and its correction	66
6	Anatomy of the binocular	71
6.1	Objektive lenses	71
6.1.1	The achromatic objektive	71
6.1.2	The ED-Objektive	72
6.1.3	The apochromatic objektive	73
6.2	Eyepieces	75
6.2.1	Simple eyepieces for narrow angles	75
6.2.2	Wideangle eyepieces	77
6.3	Mechanisms of focussing	79
6.3.1	Three different approaches	80
6.3.2	Short distance imaging	82
6.4	Ray bundle dimensions	84
6.4.1	Reduced path	84
6.4.2	Dimension of the aerial image	85
6.4.3	Prism entrance opening	86
6.5	Examples	87
6.5.1	8x42 and 10x42 binocular	87
6.5.2	7x50 wideangle	88
6.5.3	8x30 and 6x30 wideangle	89
